

GENERAL TARIFF

MULTI-LINE TELEPHONE SYSTEMS AND KEY EQUIPMENT

---

1. GENERAL

- 1.01 Multi-line telephone systems and key equipment are arrangements of equipment that include operation features in addition to those regularly provided with the basic exchange services.
- 1.02 When the Company has to install special equipment or incur any unusual expense, it may make an additional charge based on the equipment installed or additional expense incurred.
- 1.03 Items designated as de-standardized are not available for new installations or for changes of address and will only be provided for existing systems if and when equipment is available from returns to stock.

2. SERVICE FEATURES

- 2.01 Multi-line telephone systems and key equipment provide one or more of the following service features, according to the specifications in each case:
- (a) Pick-up, an arrangement whereby a telephone may be connected to nay one of two or more lines.
  - (b) Holding, an arrangement whereby a telephone may be disconnected temporarily from a line in use without breaking the connection.
  - (c) Line illumination, provided only with Multi-line telephone systems, an arrangement whereby illumination of the button associated with a line indicates that a call on the line is waiting to be answered o the line is in use. Systems with this feature are referred to herein as illuminated systems.
  - (d) Wink-hold, provided only with illuminated systems, is an arrangement whereby flashing illumination of the button associated with a line indicates that a call has been answered and is being held.
  - (e) Cut-off, an arrangement whereby the use of a line by other telephones may be controlled, or bells or other equipment may be disconnected from a line.
  - (f) Exclusion, an arrangement whereby the use of a line by other telephones may be controlled.
  - (g) Intercom, an arrangement which permits exchange of communication with one another.
